

IN THE CLAIMS:

Please amend the claims as follows:

1. (Currently Amended) A ~~method for printing an electronic presentation, the method comprising steps for processing a presentation data, wherein the method comprises steps for forming at least one printable output from said electronic an electronic presentation of a single message that comprises multiple events~~objects, by defining a temporal aspect of said events combined page or separate pages for said objects of said printable output, whereby the printable output is formed based on said temporal aspect formable into said separate pages depending on removal of irrelevant objects and conversion of continuous objects into non-continuous objects and also depending upon a temporal aspect and a spatial aspect of said multiple objects.

2. (Currently Amended) The method of claim 1 further comprising ~~step for defining a temporal-said temporal aspect by an onset of each event-object in the presentation of said single message.~~

3. (Currently Amended) The method of claim 1, wherein from one to, in maximum, as many printable outputs are formed as there are printable ~~events-objects~~in the presentation of said single message.

4. (Currently Amended) The method of claim 1, wherein one or more ~~events-objects~~are located in layout locations of the presentation of said single message.

5. (Currently Amended) The method of claim 4, further comprising ~~steps for studying a~~ spatial-said spatial aspect of each ~~event-object of said single message~~ by defining the layout location of each ~~event~~object.
6. (Currently Amended) The method of claim 5, further comprising ~~steps for combining~~ events-objects into ~~single output~~ said combined page, if their layout locations differ from another, and otherwise keeping them on ~~separated outputs~~ said separate pages.
7. (Currently Amended) The method of claim 6, ~~wherein the combined output is printed on a~~ same printout, whereas the separated outputs are printed on their own printouts further comprising printing said combined page or printing one or more of said separate pages.
8. (Currently Amended) The method of claim 1, wherein the ~~presentation-single message~~ is a multimedia message and an ~~event-object~~ is an appearance of a media object of one of the following group: editable text, non-editable text, image, animation, video, streaming video, audio converted to image or to text.
9. (Currently Amended) The method of claim 1, wherein the ~~printout is printed to printable~~ output for one of the following ~~group~~groups: a file, a hard copy.
10. (Original) The method of claim 1, wherein the printable output forms a slide of a slide presentation.
11. (Currently Amended) A device ~~for producing a printable output of an electronic~~ presentation, the device comprising means for processing a configured to process data of an electronic presentation data of a single message, ~~wherein the device comprises means for~~ forming and configured to form at least one printable output from said electronic presentation

that comprises multiple ~~events~~ objects, by defining a ~~temporal aspect of said events~~ combined page or separate pages for said objects of said printable output, whereby ~~the forming of a~~ printable output is based said temporal aspect formable into said combined page or into said separate pages depending on removal of irrelevant objects and conversion of continuous objects into non-continuous objects and also depending upon a temporal aspect and a spatial aspect of said multiple objects.

12. (Currently Amended) The device of claim 11, wherein the temporal aspect is based to an onset of each ~~event-object~~ in the presentation.

13. (Currently Amended) The device of claim 11, the device is ~~arranged-configured~~ to form from one to, in maximum as many printable outputs as there are printable events-objects in the presentation.

14. (Currently Amended) The device of claim 11, wherein said presentation comprises layout locations for one or more ~~events~~ objects.

15. (Currently Amended) The device of claim 14, ~~further comprising means for defining~~ configured to define the layout location of an ~~event~~ object.

16. (Currently Amended) The device of claim 15, ~~further comprising means for combining~~ configured to combine events-objects on the one-output combined page, if the layout locations of an ~~event-object~~ differs from the layout location of another object, and otherwise keeping them on said separate-outputs pages.

17. (Currently Amended) The device of claim 11, wherein the ~~presentation-single message~~ is a multimedia message, wherein the device is ~~arranged-configured~~ to process objects from at

least one of the following groups: editable text, non-editable text, image, animation, video, streaming video, audio converted to image or text.

18. (Currently Amended) The device of claim 11, ~~further comprising means for communication~~ configured to communicate through a wireless telecommunications network.

19. (Original) The device of claim 11, further comprising a camera.

20. (Currently Amended) The device of claim 11, ~~further comprising means for displaying~~ configured to display the presentation.

21. (Currently Amended) The device of claim 11, wherein the ~~printout~~ printable output is in one of the following forms: a file, a hard copy.

22. (Currently Amended) A system for printing an electronic presentation, the system ~~comprising means for processing a~~ configured to process presentation data, wherein the system ~~comprises means for forming~~ is configured to form at least one printable output from said electronic presentation that comprises multiple ~~events~~ objects, by defining a ~~temporal aspect of said events~~ combined page or separate pages for said objects of said printable output, whereby the ~~forming of a printable output is based on said temporal aspect~~ formable into said combined page or into said separate pages depending on removal of irrelevant objects and conversion of continuous objects into non-continuous objects and also depending upon a temporal aspect and a spatial aspect of said single message.

23. (Currently Amended) The system of claim 22, ~~further comprising means for defining~~ configured to define a layout location of each ~~event~~ object in the presentation.

24. (Currently Amended) The system of claim 22, wherein the system is ~~arranged~~ configured to combine ~~events~~ objects on one ~~output~~ page, if ~~the layout a layout~~ location of one ~~event~~ object differs from ~~the layout a layout~~ location of another ~~event~~ object, and otherwise keeping them on separate ~~outputs~~ pages.

25. (Currently Amended) The system of claim 22, ~~further comprising means for printing~~ configured to print from one to, in maximum, as many ~~printouts~~ pages as there are ~~events~~ objects in the presentation.

26. (Currently Amended) The system of claim 22, further comprising a wireless communication network for transferring the printable output ~~from the means for forming the output to the printing means~~.

27. (Currently Amended) The system of claim 22, wherein the ~~printout~~ printable output is one of the following: a file, a hard copy.

28. (Currently Amended) A device module ~~for producing a printable output of an electronic presentation, the module comprising means for processing~~ configured to process a presentation data, ~~wherein the module comprises means for forming and~~ configured to form at least one printable output ~~from said from an~~ electronic presentation that comprises multiple ~~events~~ objects, by defining a ~~temporal aspect of said events~~ combined page or separate pages for said objects of said printable output, whereby the ~~forming of a~~ printable output is based on said temporal aspect formable into said combined page or into said separate pages depending on removal of irrelevant events and conversion of continuous events into non-continuous events and also depending upon a temporal aspect and a spatial aspect of said single message.

29. (Currently Amended) A computer program ~~product~~embodied in a computer readable medium for producing a printable output of an electronic presentation, the computer program comprising instructions for processing ~~a presentation~~presentation data, wherein the computer program comprises instructions for forming at least one printable output from said electronic presentation that comprises multiple ~~events~~objects, by defining a ~~temporal aspect of said events~~combined page or separate pages for said objects of said printable output, whereby the ~~forming of a printable output is based on that definition~~formable into said combined page or into said separate pages depending on removal of irrelevant events and conversion of continuous events into non-continuous events and also depending upon a temporal aspect and a spatial aspect of said single message.

30. (Currently Amended) The computer program product of claim 29 wherein ~~the computer program product is stored on a computer readable storage medium from one to, in maximum,~~as many possible outputs are formed as there are printable events in the presentation.

31. (Currently Amended) A method ~~for delivering a printout of an electronic presentation,~~ comprising steps ~~for acquiring a presentation data from a sending device via wireless network, wherein the method comprises steps for forming at least one printable output from said~~from an electronic presentation that comprises multiple events objects, by defining a ~~temporal aspect of events~~combined page or separate pages for said objects of said printable output, whereby the ~~forming of a printable output is based on said temporal aspect~~formable into said combined page or into said separate pages depending on removal or irrelevant events and conversion of continuous events into non-continuous events and also depending upon a temporal aspect and a spatial aspect of said single message, and ~~step for printing said printable output, wherein the printout a printout of the electronic presentation is delivered to the recipient a recipient and charged a fee from the sender a sender.~~

32. (Original) The method of claim 31, wherein the printout is in one of the following forms:
a varying sized paper, a postcard, a fax, a photograph.
